Advances in Supercomputing: What Should I know?

RELATIONS INTERNATIONALES

Jeudi 14 juin
à 15h30

Entrée libre

Amphi Azoo, Campus de Belfort

► L' intervenant

Tarek El-Ghazawi,
Professor of ECE and IEEE Fellow
The George Washington University, Washing-
ton DC, USA

► La conférence

In recent years, the world has seen an unprecedented international race for the leadership in supercomputing. This talk will provide an introduction to supercomputing and its applications and will characterize the progress made in supercomputing technology over the past couple of decades. It will also characterize some of the challenges ahead and the needs for modern curricular developments across the board.
